HYP 100

HIGH PERFORMANCE ENERGY DRINK

A unique Energy and Recovery drink

It contains energy carriers in combination with electrolytes, amino acids, vitamins and minerals.

THE BENEFITS FOR YOUR PIGEONS

1. A faster recovery after the flight by perfect moisture absorption
2. An increase of condition and helps relieve thirst during the flight
3. Support of the digestive system after exertion and stress by perfect absorption of food and vitamins
4. Prevention of dehydration by drinking too much after stress, dehydration and excessive use of mineral/ grit

USE

During the flights: 30 ml per litre of water at homecoming after the flight, also the second day after an intense flight. 20 ml per litre of water on the day of basketing, or per 1 kg of feed, for condition increase and against thirst.

During stressful situations or outbreak of disease: 20 ml per litre of water over 5 days, to be increased to 30 ml per litre in case of diarrhoea and excessive drinking.

During breeding: 20 ml per litre of water or per 1 kg of feed, 2 to 3 days weekly. To be increased to 30 ml with the excessive use of minerals/grit and thin faeces. 20 ml per litre of water or per 1 kg of feed for 5 days during the transition from porridge to corn for nestlings.

During moulting and growth: 20 ml per litre of water or per 1 kg of feed, 2 to 3 days weekly. To be increased to 30 ml with the excessive use of minerals/grit and thin faeces.

Additional information: Shake well before use. Store at room temperature. Only for pigeons that are not intended for human consumption. Keep out of reach of children.
